

Abdul Kareem

Frontend Engineer | React.js | Next.js | TypeScript
Chennai, India | +91-9715896647 | abdulmct33@gmail.com
Portfolio | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Frontend-focused Software Engineer with **3+ years of experience** specializing in **React.js, Next.js, TypeScript, and modern frontend architecture**. Proven track record of delivering scalable, high-performance web applications across legal, education, and enterprise domains. Contributed to **15+ production projects** in a high-velocity service-based environment while managing up to **3 concurrent projects**, coordinating delivery, and mentoring junior developers. Expert in reusable component design, REST API integration, state management, and performance optimization.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3

React Ecosystem: Redux Toolkit, React Router, React Hooks, React Native, React Context, React Suspense

Backend & APIs: Node.js, Express.js, REST APIs, Axios, JWT

UI & Data: Responsive Design, Component Architecture, State Management, Chart.js, FullCalendar

Performance & Engineering: Lazy Loading, Code Splitting, Rendering Optimization, Reusable Components, Custom Hooks, SEO Optimization

Tools & Platforms: Git, GitHub, Postman, JIRA, Firebase, Node-RED

PROFESSIONAL EXPERIENCE

Soft Suave Technologies

Executive Software Engineer

Chennai, India

Jun 2022 – Sep 2025

- Engineered responsive web applications for **15+ production projects** using React.js, Next.js, and TypeScript in a fast-paced environment.
- Architected reusable component libraries and custom React hooks, significantly accelerating feature delivery across parallel teams.
- Managed simultaneous frontend responsibilities across **3 parallel projects**, taking primary project ownership and task coordination.
- Mentored junior developers in modern frontend standards, state management with Redux Toolkit, and REST API error handling.
- Optimized web application speed and bundle sizes using **React Suspense**, dynamic imports, and lazy loading strategies to reduce load times.
- Collaborated with cross-functional teams including backend developers, UI/UX designers, and QA engineers to drive release cycles.

Fantasy Solution

IoT Engineer

Trichy, India

Jun 2020 – Oct 2021

- Developed interactive **React.js web dashboards** to monitor and visualize real-time IoT device data and system metrics.
- Built device communication workflows using Arduino, Raspberry Pi, Python, and Node-RED for real-time telemetry processing.

Galwin Technology

Arduino Developer

Trichy, India

Jun 2019 – Mar 2020

- Designed Arduino-based automation solutions integrated with sensors and microcontrollers for enterprise and academic use cases.
- Created monitoring interfaces using React.js and Node-RED for sensor telemetry visualization.

FEATURED PROJECTS

Lawft – Legal Practice Management Platform

React.js, TypeScript, Redux Toolkit, Axios

- Resolved cross-timezone scheduling bottlenecks between FullCalendar and server UTC timestamps by creating centralized timezone translation utilities.
- Structured application state management using Redux Toolkit to isolate global app state from route-specific data, improving state isolation and execution speed.
- Implemented lazy loading with React Suspense for heavy components and complex calendar views, substantially decreasing initial bundle payload.
- Stabilized production UI issues, optimized cross-device responsiveness, implemented dark mode support, and integrated REST APIs via Axios.

Esense – Smart School System

React.js, React Native, Firebase, JavaScript

- Built role-based web applications for Admins and Teachers using React.js along with a cross-platform mobile application for students using React Native.

- Integrated virtual classroom environments via Zoom and Google Meet APIs to support seamless remote learning workflows.
- Implemented features for assignment submissions, real-time attendance tracking, automated gradebooks, and digital examination portals.
- Configured Firebase Cloud Messaging for instant mobile alerts, class updates, and school-wide push notifications.

Camu – Digital Campus Management Platform

React.js, AngularJS, TypeScript, REST APIs

- Spearheaded legacy application modernization by migrating core campus management modules from AngularJS to React.js across higher education platforms.
- Maintained complete workflow stability during complex feature migrations across multi-repository institutional software suites.
- Built reusable UI design components for student portals, grade administration, and campus attendance workflows.

Inventory Management System

React.js, TypeScript, React Hooks, Node.js

- Architected a real-time warehouse inventory management dashboard for tracking stock availability, product locations, and supply chain movements.
- Built interactive data tables with real-time searching, multi-column filtering, dynamic sorting, and bulk data export options.
- Integrated backend RESTful services using Node.js to update stock status in real-time and trigger automated reorder notifications.

EDUCATION

Bachelor of Engineering (B.E.) – Mechatronics Engineering

2014 – 2018

Anna University, Tamil Nadu, India
